Peer Review Process

Peer Review Process for GI – Gebäudetechnik in Wissenschaft & Praxis (Building Services Engineering in Science & Practice)

"GI – Gebäudetechnik in Wissenschaft & Praxis" („GI – Building Services Engineering in Science & Practice") and all of the contained articles and images are copyright protected. With the exception of legally permissible cases, utilization without consent of the publisher is a punishable offence. Only articles that have not been published in the same form previously will be accepted for the columns "Science" and "Expertise". Exceptions must be agreed upon in advance. We assume no liability for unsolicited manuscripts. The responsibility for the content of the contribution lies with the author.

Peer Review Process

Scientific articles in "GI – Gebäudetechnik in Wissenschaft & Praxis" ("GI – Building Services Engineering in Science & Practice") are selected based on professional criteria followed by an anonymous review process in which the acceptance or rejection of a manuscript is justified and documented by at least three referees. ,

The process serves to secure the magazine's high standard of scientific contributions and thus also serves as a visible instrument of quality for readers and authors.

The referee's assessment is carried out objectively and respectfully: criticism has to be expressed in a constructive manner and serves as a basis for authors to amend their manuscript.

The script is reviewed based on a standardized evaluation sheet. If need be, a comment can be added to the evaluation with a summarized recommendation at the bottom. Ideally, the referees submit a review to the editorship within four weeks.

Authors can reject revision requirements with justification if they feel they are not feasible. In uncertain cases the editorship will consult an additional referee. Final acceptance or rejection of a manuscript is made by the editorship of which they will inform the author in writing, which will include revision requirements if applicable. Reviews will not be forwarded to authors and referees will also remain anonymous to the author.
